You can insert a Cross-Reference under either the Insert tab (links) or the References tab (Captions)

Insert Cross-reference

Refer to specific places in your document, such as headings, figures, and tables.

A cross-reference is a hyperlink where the label is automatically generated. It's great if you want to include the name of the thing you're referencing.

This was available in Word 2011 for Mac, and MS won't say whether they'll ever enable it for non-365 licensees of Word 2016 (we've asked in other threads), but as of the current non-365 build (15.. As illustrated by Qing Tang, those controls [actually improved versions of them] are included on the Ribbon, they just are not included in the Paragraph group on the Home tab where one might expect to find them.

Better yet, proficient users of the program include Paragraph Spacing along with the other formatting specifications in the definition of the Paragraph Styles used to format the document.. UI file to make modifications to the ribbon by following the instructions provided by Rich Michaels in his response from September 27, 2016 on.. As far as I know, there is no simple way to add, remove, or change buttons in the ribbon for Word 2016 for Mac unless you have an Office 365 subscription, which many don't.. And finally, if you're very adventurous, comfortable editing XML, have access to a PC version of Word, and have nothing better to do with a few hours of your time, it is technically possible to hack into you Office.

Rpc1 org down vs lg gsas10n region free firmware for mac For the requirement of most users, it's more practical to use the DecreaseParagraphSpacing & the IncreaseParagraphSpacing commands instead.. For the commands you want, your best option

to avoid all those extra clicks might be to assign a keyboard shortcut to the built-in Word command, which you can do by going to Tools --> Customize Keyboard, and finding the commands shown below: Or, if you regularly use the same spacing above/below paragraphs over and over again, you could also consider setting up paragraph styles in which your preferred spacings above/below are defined and change the spacing that way.. For some unknown reason they're on the Layout tab instead FWIW, I agree with John_461 about the assignment of keyboard shortcuts, but not necessarily to the same commands he suggested.
